

S

"S" installation and testing services for options and accessories at time of order

Dini Argeo can offer an installation and testing service at time of order for the devices purchased, in order to simplify and speed up the system installation at the end customer. At the time of ordering the system, each code accompanied by its service will be installed and tested by our technical staff.

**The best solution
for advanced industrial
applications**

How to identify the installation service for the desired option

- Each option and accessory, that can be installed and tested at time of order, is marked by a code (SX), which precedes the description:

Communication Interfaces			
	Code	Description	Price €
	<u>OBRF-2</u>	(S2) External 868 MHz radio module, cable l=3m (cable gland not included) ABS IP65 protecting box, 3 m cable, power supply from weight indicator. Max. distance, in appropriate environmental and installation conditions: 70m indoors, 150m outdoors. 50 configurable channels.	200,00
	<u>OBRFUSB-2</u>	(S2) 868 MHz external radio frequency module, USB cable l=1m. Max. functioning distance, in appropriate environmental and installation conditions: 70m indoors, 150m outdoors. 50 configurable channels. (OBRF232 must be combined with another radio module).	367,00
	<u>RFITR-1</u>	(S2) Built-in 868 MHz radiofrequency module Max. functioning distance in appropriate environmental and installation conditions: 70m indoors, 150m outdoors. Up to 50 configurable channels.	265,00
	<u>WIFITD</u>	(S2) Built-in Wi-Fi interface for wireless connection (through access point)	

At the time of order, each option accompanied by its service will be install and test during the system production, otherwise it will be delivered in its own packaging, not installed.
