

“ DINI AR GEO SOLUTIONS, IDEAL FOR ANSWERING THE SPECIFIC NEEDS OF THE ANIMAL HUSBANDRY INDUSTRY ”

Maximize long-term profits and be sure to keep your livestock healthy by consistently and accurately weighing your animals!

Weight is a key aspect for the success of breeders' business, for raising and selling animals, as well as monitoring health, growth, reproduction, weight loss and more.

Furthermore, for selling livestock, the scales must be approved for trade.

Dini Argeo scales can be brought close the animal enclosure, providing reliable, accessible weighing everywhere.

“ WE CAN MAKE THE RIGHT WEIGHING SYSTEM FOR YOUR FARM ”

THE NEW WEIGHT INDICATOR MAKES WEIGHING LIVESTOCK QUICK AND EASY

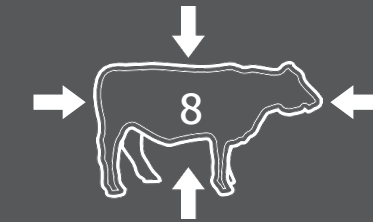

With Dini Argeo livestock weighing systems, you can acquire **accurate and stable** weight data **fast**, during normal work activities, without the animal having to stop moving, minimizing sources of stress and ensuring **reliable measurements**.

LIVESTOCK SCALES: THE FIVE ASPECTS TO CONSIDER

Choose the livestock scale best suited to your needs according to your weighing goals.

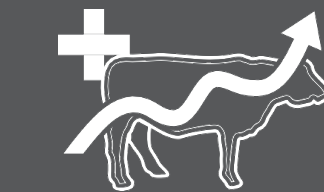

1

WEIGHT LOSS

Minimizing weight loss is an important factor for increasing profits. When transporting livestock, consider the weight that the animal will lose during the journey to its destination.

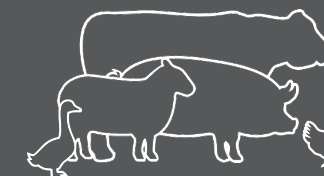

2

ANIMAL WELFARE

Having an on-site scale is beneficial in keeping animals healthy. An easily accessible scale means you can monitor any abnormal fluctuations in animal weight. If an animal is sick, the veterinarian can come to your farm and weigh it accurately, saving it the stress of unnecessary travel.

3

SCALE SIZE

It is important to know whether you need a scale to weigh a single animal or several animals at once.

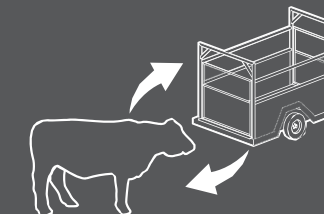

4

APPROVALS AND REGULATIONS

The scale must be approved for trade to sell livestock. Approval ensures that weighings used in trade are accurate, traceable and compliant.

5

MOBILITY

A mobile, portable scale can be taken to where the animals are, while a stationary scale requires that the animals be transported to it. Determining whether you need a portable scale or a stationary one is an important factor to be considered.
